

20 October 2025

Mr Theo Marchbank
Flat 12, Redecombe House
34 Calverley Grove
London
SE28 4QT

Dear Mr Marchbank,

Your recent blood test results

Thank you for attending for blood tests on 13 October 2025 as part of your new-patient health check. Dr Priya Ravensworth has now reviewed the results, which are summarised below.

Test	Your result	Reference range	Comment
Full blood count	Normal	—	Normal
HbA1c	34 mmol/mol	20–41 mmol/mol	Normal
Total cholesterol	4.6 mmol/L	below 5.0 mmol/L	Normal
Ferritin	88 µg/L	30–400 µg/L	Normal
Vitamin D (25-hydroxy)	42 nmol/L	50–120 nmol/L	Borderline low

Almost everything is comfortably within the normal range and needs no action. The one exception is your **vitamin D** level, which is slightly below the level we like to see. This is very common in the UK over autumn and winter and is nothing to be concerned about. We suggest you take an over-the-counter vitamin D supplement of 10 micrograms (400 units) a day between October and March, which you can buy inexpensively from any pharmacy or supermarket. There is no need to repeat the test unless you develop new symptoms such as persistent bone or muscle aches or marked tiredness.

You do not need to book an appointment about these results. If you have any questions, please contact reception and one of the practice team will call you back.

Yours sincerely,

Dr Priya Ravensworth
General Practitioner, Calverley Park Surgery
