Your air source heat pump proposal

Hi Theo — thank you for having us round. Based on our survey of Flat 12, Redecombe House, here's a complete, no-surprises design for replacing your gas combi boiler with an air source heat pump. Everything below is fixed-price: design, equipment, installation, commissioning and handover, with monitoring included for the first year.

The system we've designed for your home

HEAT PUMP Caldera Aero 6 monobloc	OUTPUT AT DESIGN POINT 5.8 kW at -2 °C	HOT WATER CYLINDER Caldera 180 L slimline cylinder
CALCULATED HEAT LOSS 4.9 kW (room-by-room)	ESTIMATED EFFICIENCY (SCOP) 4.1	RADIATOR CHANGES 3 radiators upsized

Your investment

Item	Amount
Caldera Aero 6 air source heat pump (monobloc)	£5,240.00
Caldera 180 L slimline hot water cylinder	£1,380.00
Installation labour, plumbing and controls (3 days, 2 engineers)	£3,450.00
Radiator upgrades — 3 radiators supplied and fitted	£940.00
Full system flush and magnetic filter	£420.00
Commissioning, handover and first-year monitoring	£350.00
External wall mounting bracket and anti-vibration kit	£310.00
Survey fee credited on acceptance	-£150.00
VAT — zero-rated (qualifying energy-saving installation)	£0.00

Total installed price	£11,940.00
-----------------------	------------

Government grant support. Your property qualifies for the government low-carbon heating grant of £7,500. We claim it for you and knock it straight off the bill — you'd pay **£4,440.00** in total.

What your heating could cost to run

	Current gas combi	Proposed heat pump
Estimated annual heating & hot water cost	£742	£618
Estimated annual CO ₂ saving	—	1.1 tonnes

Estimates use your last twelve months of energy bills and current unit prices; real costs vary with tariff and weather.

Everything included, nothing extra on the day

Ten-year warranty on the heat pump, five years on the cylinder, and our two-year whole-installation workmanship guarantee. The Aurellon app shows live performance and flags problems before you'd notice them — first year of monitoring free, £4/month after.

We handle permitted-development checks, building-control notification and the grant paperwork. Installation typically takes three days; we leave your old boiler removed and the system fully commissioned with a full handover session.

Next steps

Reply to this proposal or call Maya Brenchley on 020 7946 0662 to book. We take a £500 deposit to schedule installation (fully refundable until survey sign-off), the balance on commissioning day. This proposal is valid until 21 August 2026.

Assumptions. Price assumes clear access to the external wall agreed at survey, existing electrical supply adequate for the unit specified, and no asbestos-containing materials disturbed. Anything outside these assumptions is quoted before work begins — never invoiced after the fact.

Grant eligibility was checked against your property details at survey and is subject to final approval by the scheme administrator; if a claim were declined we'd contact you before proceeding rather than pass the cost on.

Cancellation. You have a 14-day cooling-off period from accepting this proposal, with a full refund of any deposit.
